DAY BEFORE PROCEDURE:

1. **Drink only CLEAR LIQUIDS for breakfast, lunch and dinner.** Suggestions below.
2. Starting anytime after 4:00 p.m., pour ONE (1) 6 oz. bottle of Suprep liquid into the mixing container. Add cool drinking water to the 16 oz. line on the container & mix. Drink all the liquid in the container. Expect MANY bowel movements to follow.
3. You must drink two (2) more 16 oz. containers of water or clear liquid over the next 3 hours. This is very important to avoid dehydration.

MORNING OF PROCEDURE:

Approximately 2-3 hours *prior to leaving* for your procedure, repeat step 2, drinking your second dose. Be sure you finish drinking all of the dose at least one hour before leaving. Do not drink any more liquids other than the Suprep in the morning. Typically, you will only have 1-2 bowel movements after the 2<sup>nd</sup> dose of Suprep.

(It is preferred for you to take the 2<sup>nd</sup> dose the morning of procedure, but if you have a very early arrival time, you can take both doses of Suprep the evening before: 1<sup>st</sup> dose at 4:00 p.m. and 2<sup>nd</sup> dose at 10:00 p.m.)
